PROFILE SUMMARY

BIM & Digital Construction Specialist and Architect with 5+ years of experience across UK offsite construction and architectural practice in India. MSc in BIM Project Management from Queen's University Belfast, with hands-on experience in BIM coordination, Revit, Autodesk Construction Cloud/BIM 360, Common Data Environments, Revit API, Autodesk Platform Services and digital workflow automation. Sole developer of a full-stack BIM platform adopted by 62+ users, delivering approximately £15,000 in projected annual licensing savings. Experienced in translating construction and project requirements into practical digital workflows, tools and information-management solutions.

WORK EXPERIENCE

Merit, Newcastle, UK

Aug 2023 – Jan 2026

BIM & Digital Construction Specialist

- Sole developer of Spark Construct, a full-stack BIM platform integrating Autodesk Platform Services, Revit workflows and the Common Data Environment (CDE), adopted by 62+ active users across business and project teams.
- Delivered approximately £15,000 in projected annual licensing savings by replacing and consolidating third-party BIM tools.
- Built a Revit API plugin that automates elevation generation, cutting a 4-hour task to 30 minutes (about 87% time saved).
- Developed an MEP automation tool that places cable trays and associated wires/conduits automatically, streamlining coordination and modelling.
- Created a parametric PAM (Pre-Assembled Module) concept generator for hospital projects: users enter site dimensions, levels and parameters to generate and compare multiple modular 3D configurations; extended it toward automated linking of conceptual and detailed Revit models.
- Built Microsoft Teams, Planner, Power Automate and Power BI workflows to automate project tracking, task management and reporting.
- Applied ISO 19650, ACC/BIM 360 and CDE principles to information management in a UK offsite and modular (DfMA) construction environment.

Zeppelin Design and Environments, New Delhi, India

Oct 2020 – Sep 2022

Senior Architect

- Designed projects for the principal client, a premium bathware brand, including regional centres, offices and showrooms displaying its premium product range.
- Prepared complete working drawings and detailed furniture drawings for each project.
- Collaborated with a design agency to deliver a temporary exhibition structure for a mattress brand from concept to completion, including site coordination drawings and site visits.
- Created 3D models and visualisations in 3ds Max and presented designs to clients for bakeries and restaurants.

Sconce Global, New Delhi, India

Sep 2019 – Oct 2020

Architect

- Developed conceptual and detailed architectural designs across multiple project stages.
- Prepared client presentations, working drawings and design documentation.
- Coordinated with clients, consultants and site teams during design development and execution, and helped resolve design, technical and site issues.

EDUCATION

Degree	University	Year	Grade
MSc, BIM Project Management	Queen's University Belfast, UK	2022 – 2023	67.5%
Bachelor of Architecture (B.Arch.)	Jamia Millia Islamia, New Delhi	2014 – 2019	71.7%

SKILLS

BIM & Digital Construction:	Revit | BIM 360 | BIM Coordination | BIM Project Management | Common Data Environments | Digital Construction | Digital Workflow Automation
Development & Automation:	Revit API | Autodesk Platform Services (APS) | React | TypeScript | Node.js | Azure | Power Automate | Power BI
Architecture:	AutoCAD | Architectural Design | Design Development | Technical Drawings | Working Drawings | Design Coordination
Data and Research:	SPSS | NVivo | Data Analysis | Research & Thematic Analysis
Professional:	Problem Solving | Cross-functional Collaboration | Technical Communication | Requirements Analysis | Self-directed Learning

LANGUAGES

English, Hindi and Urdu
